

Needed: Replacement for the Computer Club Web Site

The Computer Club is seeking someone to become Web Master and create a new site for the Club. The incumbent will have a free hand choosing software and styles either from what are familiar from prior experience or they may choose to learn something new. The computer club will reimburse any reasonable cost.

It is a challenging opportunity to sharpen your skills while providing a much needed Community service.

The Computer Club web site was created 16 years ago using Dreamweaver software. The styles are out of date and cannot be readily maintained with currently available web design and development applications.

The current CC Site Web Master, (Bill Raymond, WC-514) will assist as needed in the transition to the new Site.
